

Workshop on Molecular Evolution

Marine Biological Laboratory, Woods Hole, MA USA

May 26 – June 5, 2023 | Application Deadline: February 28, 2023

COURSE DIRECTORS:

Peter Beerli, Florida State University

Laura Kubatko, The Ohio State University

The Workshop on Molecular Evolution, founded in 1988, is the longest-running workshop in evolutionary biology. Students work closely with internationally recognized scientists and receive high-level instruction in molecular evolution and evolutionary genomics principles, advanced training in statistical methods best suited to modern datasets, and hands-on experience with the latest software tools (often from the authors of the programs they are using). The material is delivered via lectures, discussions, and bioinformatic exercises motivated by contemporary topics in molecular evolution.

The MBL is an Affirmative Action/
Equal Opportunity/Disabled/Veterans
Employer and an affiliate of the
University of Chicago.
